

IDRIJA LACE FESTIVAL

announces

THE INTERNATIONAL BOBBIN LACE COMPETITION 2020 **POSTPONED TO 2022**

Competition topic: Idrija narrow tape lace

Idrija narrow tape lace is the one technique of Idrija bobbin lace that is most recognisable and popular among lacemakers all around the globe.

Lace done in this technique is identified by a narrow tape meandering across the surface and filling the entire pattern. The empty spaces in the lace are filled with loops or simple fillings, most often plaits. Idrija narrow tape lace features five pairs of bobbins on the inner part of the pattern, while an additional, sixth pair is added on the outer side with inside pins or outside pins with double twisting. An aesthetically produced Idrija narrow tape lace must have all threads tightly intertwined and every loop adequately twisted.

A lacemaker wishing to make lace in the Idrija narrow tape lace technique must respect its rules. The lace applied for the competition must therefore be made in accordance to the basic laws of Idrija narrow tape lace yet surpass the ordinary purposes of use and reflect a diversity in the perception of this technique.

The originality of lace lies in its transparency. It captures our eye with its contrast between full and empty, while the mere twisting and crossing the threads over and under open limitless creative possibilities.

Idrija narrow tape lace enables various expressive possibilities in pattern designing. In addition, the harmony of the form, a correct choice of materials and a combination with other lacemaking techniques provide new and original solutions.

Allow your imagination to soar, your pencil to draw an original motif in Idrija narrow tape lace technique, your hands to feel the softness of the threads, and your creativity and knowledge to create the lace.
